

Dear parents,

We are delighted to provide another update on Axcel Campus' activities. The students sat for their first test in March. For most of them it was also the first time that they were taking the test papers in English! Subjects such as World History and Geography were new to many of them, while for science, they were tested separately on Biology, Chemistry and Physics. We believe that inculcating the culture of 'speaking English only' throughout Axcel Campus is especially valuable in preparing our students.

In the Information, Computer and Technology ('ICT') classes, students are actively engaged in learning new technology in a fun way. So far the students have been taught various programmes including Microsoft ("MS") Publisher, MS Access, MS Excel and Khan Academy - Pixar's In the Box. In line with our aim of incorporating Attitude as part of the learning, students were required for instance to design an info-graphic on anti-cyberbullying.

Sample of ICT works done by the students

HOW YOU REACT TO CYBERBULLYING CAN HELP A LOT

IT CAN HELP ONE FROM COMMITTING SUICIDE	HELP THEM FROM HAVING PRESSURE
HELP THEM TO SEE A BETTER WORLD INSTEAD OF HIDING FROM IT	
INCREASE THEIR SELF-ESTEEM	HELP THEM TO RELAX AND FORGET THE PAST
BE MORE CHEERFUL AND HAVE A POSITIVE THINKING	

Social Emotional Development

In collaboration with Global Peace Foundation, students had the first session of the social emotional development programme. Dr Teh Su Thye, CEO of Global Peace Foundation together with his team led the Junior

Changemaker Workshop aimed at raising self-awareness and social consciousness among our younger generation. The students learnt the importance of self-development and acceptance of differences in terms of race, religion and characteristics for the benefit of harmonious living in a fun and engaging session.

Team Building Day

Axcel Campus conducted our Team Building day at Botanic Park, Shah Alam. The various activities carried out throughout the day required teamwork among the students in order to complete some challenging tasks, hence developing their communicational skills, besides improving morale and productivity. Students also benefited through experiencing a sense of accomplishment in completing these challenging tasks successfully. The students enjoyed the outdoor activities thoroughly during the event which was held prior to their first term break.

Axcel Workshop

Axcel Campus strongly believes that creativity and innovation can be cultivated, and our children should begin young. In addition to the New Product Innovation classes conducted during Axcel Programme, students

attended a 2-day workshop on Creativity and problem solving. The workshop was conducted by Mr Tan Eng Hoo, a specialist from TRIZ, an organisation promoting creativity and innovation globally. Students learnt how to observe, how to ask and how to question while they tried to develop improvements to products.

Mentor sharing Programme

We had another Mentor Sharing Programme, hosted by a very experienced and well respected person in consultancy and the oil & gas industry; Mr Lim Beng Choon. While attached to Accenture, Mr Lim was the country Managing Director and also Managing Director for the oil and gas sector in Asia. He shared on the importance of understanding one's strength and self-confidence; having a mentor or coach; and that in life, it's not what you do but it's how you do it that makes a difference. Mr Lim is currently a board member of Petronas Dagangan and MISC, and acts as Executive Trustee for ECM Libra Foundation.

Field Trip

Axcel Campus organised a field trip for our students to the Engineering Department of Inti International University. We visited their well-equipped mechanical engineering, civil engineering and AutoCAD labs. Field trips give students educational experiences away from their regular school environment. Field trips can allow students to learn of new job opportunities and also spark new interests and passions. By seeing real-life application of the science lessons that they are learning in school, students are more likely to understand and appreciate the importance and relevance of what they are learning.

We will continue to strive to promote a holistic academic environment for our students to experience the best possible educational journey. While the pursuit of academic knowledge is the basic focus, our passionate and committed teachers endeavour to make learning fun with experiential and active learning.

Thank you very much for choosing Axcel Campus - A.S.K Beyond Academic Excellence

Heartfelt Regards,
Wynce Low
Chief Education Officer
