Dear esteemed parents,

Time really flies when we are enjoying what we are doing! We are pleased to have completed our second academic year with energizing and holistic programmes for our students. We are delighted to provide another exciting update on Axcel Campus’ activities since October 2018.

Holistic Education beyond Classrooms and Exams

We continue to engage with our partners and industry experts to connect students to life after school, the real world to achieve our vision of “A.S.K beyond academic excellence.”

Our 8th Mentor under this programme is Mr Wilson Beh. He is the Chief Operating Officer and Co-Founder of PolicyStreet, an award winning start-up company that empowers the underserved with financial security. Wilson was recognised by Forbes - 30 Under 30 - Asia - Finance and Venture Capital 2018, an accolade to the brightest entrepreneurs, innovators and game changers under the age of 30. He was a recipient of the prestigious Fulbright scholarship to pursue studies in the United States of America. Wilson shared with the students some key learnings in life: “Gratitude is the best attitude”, “Dream big, think global and be innovative” and to keep improving on their core strengths. He also stressed the importance of having good communication and people skills and to be a good listener.

 Students attended a 2-hour “Memory Enhancement and Brain Supercharging” workshop by Mr Maqshood, an experienced trainer from Sri Lanka. The workshop focused on brain development, mental fitness (Neurobics), brain likes and dislikes and food for the brain. More than 50,000 participants from Sri Lanka and abroad have benefited from this workshop.
Senior students of the campus attended the “Learning and Exam Techniques” workshop by Mr Faizeen, an experienced trainer from Sri Lanka. He has trained many students across Sri Lanka, Malaysia, China, Russia and Maldives. At the workshop, students learned the concept of knowledge and learning, learning techniques, time management and how to score in examinations.

Inspiring Guru is a programme for students to learn and be inspired by good role models. Our students researched on notable and successful women: Sheryl Sandberg, Chief Operating Officer of Facebook; Fei Fei Li, Head of Google AI; Jacinda Ardern, Prime Minister of New Zealand; Tan Hooi Ling, Co-Founder and COO of Grab; Jean Liu, CEO of Didi Chungxing and Lucy Peng, CEO of Lazada. Under this programme, our students were motivated that there is no gender glass ceiling in success that it is within grasp of everyone who desires it. Students were encouraged to have a global mindset and stay focused on their dream.

Parenting Talk by Mr TY Ko and Briefing by University of Nottingham
In addition to the bi-annual Parent-Teacher meetings, the Parenting Talk and University Briefing were organised to increase engagement with our students' parents. We strongly believe that a three-party involvement of teacher, student and most importantly the parents can play an integral role in a child's development in education.
Embracing Holistic Education with Experiential and Active Learning

Axcel Ted-talk competition

Our annual Ted-talk competition requires compulsory participation by each student. They are required to present in front of other students and teachers. As part of the culture in Axcel Campus, all students are given opportunities to put into practice their presentation skills through lessons in class; in every subject, both individually or group projects. Students learnt from one another how words, body language, speed and tone of voice, and a personal story can bring out the desired impact of an important and meaningful message.

Axcel Philanthropy Day

The Axcel Philanthropy Day is a platform for students to cultivate a “giving-back to society” mind-set through their time, energy and a thoughtful heart. Our students' successful efforts in raising profits from the July 2018 Entrepreneur Day were contributed to a few charity organizations. The students also spent a day at the Spastic Centre of Selangor, from which they learned to appreciate the blessing of being physically able. They also learnt to empathize and be sensitive to the needs of others especially the less-abled.
Field Trip – Kuala Lumpur Engineering Science Fair (KLESF)

Educational field trips contribute to better student outcomes in school and beyond. A trip to the KLESF broadens students' awareness and perspective of how science, technology, engineering and mathematics (STEM) increasingly plays an important role in current and future socio-economic well-being and sustainable development of our society.

Axcel Rising Star

Students showcased their talents through various performances including skits, dance, band, songs, magic shows and there was even a locksmith competition!

Axcel Awards Day

Students were acknowledged for their achievements in different categories. These included on academic achievements, merit awards for improvements, characters recognition, innovation competition and Outstanding Student Award.
Sports and Other Competitions

As a platform to discover one’s ability and breakthrough one’s limit, students competed in both internally and externally organised competitions, including chess, badminton, doggeball, cup-stacking and the Queen's Commonwealth Essay competition, the world’s oldest schools’ international writing competition.

KLESF International Challenge Competition

Our students' project entitled “Biodegradable Plant Pot” using gelatin packed with nutrient won the Merit Award, despite it being the first time that our students are participating in this international challenge.

Lastly I would like to sincerely thank the parents for their trust and support throughout our two years journey. We will continue to strive towards promoting a holistic academic environment to connect our students to the real world. We thank our team of passionate principals and teachers for their commitment in promoting a holistic education while making learning fun and engaging through an experiential and active approach.

Thank you very much for choosing Axcel Campus – A.S.K Beyond Academic Excellence

Heartfelt Regards,

Wynce Low, Chief Education Officer
